

Termomeccanica Ecologia
Termomeccanica Group

TM.E. S.p.A. - Termomeccanica Ecologia

is the Company in the Termomeccanica Group that deals with constructing and managing environmental and industrial engineering works.

At TM.E. S.p.A. we are committed to working responsibly on all aspects of our business, remaining true to our values and the Group's roots.

Our development model is based on economics aimed at sustainability, broken down by the

Agenda 2030

Sustainable Development Goals

that become the *"audacious, transformative steps to put the world on a sustainable, resilient path"* as stated in the Agenda itself.

We back up our *sustainability* commitments by implementing actions with a responsible environmental impact, as well as projects that facilitate a more fair and peaceful society, by means of actions aimed at facilitating wellbeing, inclusion and equal opportunity, building a resilient infrastructure, and ensuring sustainable production and consumption models.

La Spezia, 23.01.2023

Managing Director

We firmly believe in the importance of implementing sustainable practices, focussing our efforts on the following goals:

7 AFFORDABLE AND CLEAN ENERGY

Ensuring access by all to economical, reliable, sustainable, and modern energy systems, improving energy efficiency

To attain gender equality by applying the principles of Diversity and Inclusion, putting an end to all forms of discrimination in relation to women and girls, while ensuring full, effective female participation and equal leadership opportunities

5 GENDER EQUALITY

Building a resilient infrastructure and promoting innovation and fair, responsible, and sustainable industrialisation, increasing efficiency when it comes to using resources, and adopting industrial technologies and processes that are cleaner and more healthy for the environment.

9 INDUSTRY, INNOVATION AND INFRASTRUCTURE

11 SUSTAINABLE CITIES AND COMMUNITIES

To make cities and human settlements inclusive, safe, long-lasting, and sustainable, paying particular attention to air quality and management of urban and other waste.

8 DECENT WORK AND ECONOMIC GROWTH

To incentivise long-lasting, inclusive, and sustainable economic growth, with full, productive employment, and dignified work for all.

To promote actions to combat climate change

13 CLIMATE ACTION

12 RESPONSIBLE CONSUMPTION AND PRODUCTION

To guarantee sustainable production and consumption models, by sustainable management and efficient use of natural resources. Eco-compatible management of chemical substances and all waste throughout their life cycle, in accordance with agreed international frameworks

Our commitment to promoting global goals

To deem ESG Sustainability to be a strategic tool for development and social responsibility

To disseminate an approach to sustainability among all stakeholders in TM.E. S.p.A. - Termomeccanica Ecologia.

To assure our clients of our commitment to ESG sustainability by signing up to the ECOVADIS platform.
